DL Jones Construction Services LLC is a privately held company that has been providing industrial construction services since 2005. In that time frame, DL Jones has experienced tremendous growth and has expanded its services into other construction market sectors. DLJC is currently working in the Food Processing, Oil and Gas, Chemical and various agriculture related industries and provides its customers with a **SAFE, QUALITY** project; completed **ON BUDGET**, and in a **TIMELY** manner. DLJ's construction services include General Contracting, Process Piping fabrication & installation, Millwright Services, and fabrication and installation of Structural & Miscellaneous Steel.

DL Jones is committed to achieving customer satisfaction. The DLJC team is determined to provide the best dependable service and solutions to assure a successful project. It is our goal to exceed expectations and to build and maintain quality working relationships.

## Safety

Accident prevention is the prime objective of the DL Jones Construction organization. DLJC's commitment to Safety extends to each of the employees and all jobsites – from the president to newly hired personnel.

It is the intention of DLJC management to provide safe and healthy working conditions for all employees and to establish and insist upon safe practices at all times by the entire organization. Similarly, each supervisor must make the safety of employees an integral part of his or her regular management function. It is equally the duty of each employee to assist and follow established safety regulations and procedures.

## Injury and Illness Prevention Program

DL Jones Construction is dedicated to eliminating general and environmental hazards to protect our personnel from jobsite risks. It is paramount that employees follow strict safety and health requirements and remain current with State and Federal regulations. To this end, continuous efforts to create the safest

working conditions possible and to train all employees with appropriate safety policies and procedures. DLJC has developed a well-defined Injury and Illness Prevention Program, which is read by every DL Jones employee and acknowledged in writing that he/she understands and accepts it.

The DL Jones Injury and Illness Prevention Program is available to all of our Clients for their review. In addition, we will be pleased to present current and past Worker's Compensation Experience Modification Rates. DLJC is committed to achieving the goal of a zero accident rate for employees.

# BUILD WITH THE BEST!

# Industries

DL Jones Construction is a multi-disciplined general contractor who specializes in mechanical system installations for industrial processing plants. While the majority of projects have been in the areas of Agricultural related processing and biofuels, our capabilities are not limited to these industries. DL Jones Construction has the experience, skills and resources necessary to undertake any industrial or general construction project.

## INDUSTRIAL FOOD PROCESS

DL Jones Construction has provided heavy industrial construction services to the Food Processing Industry since its inception. Knowledge of all components of the process: preparation, extraction, refining, receiving, load out, storage, and waste water treatment. DLJC provides a vast range of experience in this industry including sugar beets, soybeans, corn, and sunflower.

## GRAIN PROCESSING & STORAGE

DL Jones Construction has a very strong background in the construction, maintenance, repair, renovation and installation of grain handling, storage and milling systems. Whether you are looking to build a new facility from a green-field site or need maintenance and repair services on an existing plant, DLJC has the skills and knowledge to perform the work beyond your expectations. We provide value through quality workmanship and service, while maintaining safety as the primary goal. We bring this wealth of experience, as well as cost-effective and innovative solutions, to the agricultural industry.

## CHEMICAL PROCESSING

DL Jones Construction is also active in the chemical processing industry having had an on-site presence at chemical plants in Ohio and Texas in addition to other projects throughout the Midwest. DLJC has experience working with a company that specializes in producing various technologies for the transportation, industrial and consumer markets.

## BIO FUELS / RENEWABLE ENERGY

With the Federal Energy Policy Act of 2005, the anticipated ban of MTBEs, there will be a high demand for quality construction service providers in the growing US Renewable Fuels market. DL Jones Construction's industry experience and multi-craft capabilities position us to act as your constructor.

## OIL/GAS

DL Jones Construction offers various services for the Oil / Gas Industry. We thrive on the challenges presented by projects that require meticulous project management and a team of highly-skilled and motivated professionals from project managers to welders. DLJC's projects demonstrate what can be accomplished when great companies and great people plan a job together from start to finish.

## MAINTENANCE

DL Jones Construction provides a full range of maintenance, general services and small capital improvements to a variety of industrial clients and markets throughout the Midwest and the South. DLJC service's a wide range of industrial clients from a strong foundation and long history within the industries served. DLJC has created an environment that fosters safety as a value and a priority. Working closely with clients to improve reliability, productivity, planning and work processes, results in full service, cost effective partnerships.

## CONSTRUCTION MANAGEMENT

In addition to self-hire turnkey ability, DL Jones Construction has the seasoned construction professionals and modern project control systems to provide complete construction management services. Phases of work can be subcontracted as specialized expertise or client needs may dictate. DL Jones Construction can also partner with a client's architect/designer to manage large construction programs. We are capable of performing all of the following:

- Plan Preparation and Construction Analysis
- Material and Equipment Procurement
- Inventory Management
- Subcontractor Pre-Qualification, Selection and Management
- CPM Scheduling and Cost Management
